

MEKSER AIR UNITS

"MEKSER Premium" Type-approval certified air-water unit is a fully automatic digital system that can increase or decrease the air pressure of the tire according to the user's request.

"MEKSER Premium" general features;

- Easy to use, fast and precise.
- Display screen 3-digit, 1 "LCD panel, self-illuminated, blue backlight.
- Air pressure in Psi / Bar.
- Pressure accuracy 0.01 bar = 0.15 psi.
- Design suitable for indoor and outdoor use.
- Automatic adaptation to mains supply 90-240 VAC.
- Impact resistant, suitable for outdoor weather conditions, metal and waterproof programming buttons life span 10 million press.
- The maximum input pressure (from the air compressor) is 13.8 Bar = 200 PSI.
- Maximum tire inflation caliber pressure is 11.0 Bar = 160 PSI.
- Operating at temperatures between -40 oC and + 80 oC.
- SMB technology electronic control board.
- Automatic start for consecutive tire fillings.
- Water and particulate filter at the air supply inlet with automatic water discharge.
- 10 mt. Spiral air/water hoses.
- High quality water nozzle and air chuck.
- Body with galvanized sheet metal painted with electrostatic baked paint.
- Modular design for easy service and maintenance.
